

Horticulture opportunities Netherlands

1. Horticulture

25 ha asparagus, strawberries in greenhouse (3ha), strawberries on the field (18ha), strawberry plants (40 ha)

The company started in 1972 as a family business, as it is today. In recent years we expanded. We offer employability for many. We sell directly to customers from our shop, we peel and pack the asparagus, we pack the strawberries. Some tasks will be done on the field by the agricultural contractor. We had trainees in the past. Then for several years we did not and from 2016 onwards we are able to offer a training placement again. We do many things, so you can learn a lot and get new ideas.

Training placement available between March and end of October.

2. Horticulture under glass; tree nursery/ young plants

Shrubs, conifers and climbing plants: wide assortment from Azalea to Zizphus
We are a family company with passion for our company, especially in the summer season it is very busy and we have more time to relax in the winter months. We are the 3rd generation and started with a traditional outdoor tree nursery in Boskoop. Now we are a modern multiplication company of shrubs, conifers and climbing plants. We multiply by means of propagation by cuttings and have a production of 4000000 young plants per year. We take care of the young plants and sell them to the growers who cultivate them into the final product. We offer a wide range from Azalea to Zizphus, but focus on the difficult crops. We have good contact with the customers and can work with their wishes. We are a small flexible team of people who love their job. We try to produce better every day and want to participate in the top. European growers are our main customers with a peak in April/May. We then produce and deliver at the same time. In the wintertime we export to some customers in Asia.

Training place available for a motivated trainee with good communication skills between February and October for 3 months.

3. Recreational, diverse horticulture

0.5 ha Apple orchard, berries, flowers and rhubarb.

Children's farm: 10 young stock, 1 goat and 10 poultry
