## Internship with fruit tree trials

We are seeking applicants interested in fruit tree research and fruit quality testing. The internship will start between April and July.

Required qualifications:

- Education in horticulture or closely related sciences
- Some experience with fruit tree growing
- Good English language skills
- Willing to work and live in a diverse, international group
- Honesty, reliability, passion towards horticulture
- Desire to expand knowledge and skills every day
- Driver's license and good driving skills

You will have an opportunity to spend 6-12 months in a research/development institution working on improving quality and health of various fruits, mainly apples and cherries.

The hosting institution will organize housing and transportation and provide good compensation. The internship takes place in Washington State that is the global fruit production center. This is a very attractive area to people that enjoy outdoor activities.
